

PAQUITA:

There is nothing but JOY and BLISS when you look at Paquita's beautiful face! She is a 4 year old Pincher Mix who was abandoned by her family who decided to move.

Apparently, leaving very alone in the streets to suffer was a lot easier than taking her with them. She was found by a wonderful volunteer named Daniela in the streets alone. She was hiding and shaking in fear! Of course, the poor baby was terrified! Paquita is now doing wonderful and is in foster with Kate and Sam. Paquita is spayed, healthy, and vaccinated and ready to fly. Kate and Sam say she is doing great in foster!

She enjoys sitting on laps, being caressed, and going for walks! Paquita is still looking for her forever home, but just in case she doesn't find a forever home by the time of the cargo flight, we have fosters set up Stateside who will take her and care for her until we find her the most perfect forever home. Paquita has been waiting over a year to be adopted and has missed several chances to fly home due to cancelled flights and lack of flight volunteers as the COVID scare began to spread in early March! Please help us get her to safety!!
